

# ITT

**FLOWTRONEX®**

## Enclosures

### Pump Houses, Trailers, & Vaults

ITT Flowtronex provides an enclosure suitable for every manufactured pump station where one is needed. Especially available for our Engineered to Order pumping systems, enclosures are available in the form of houses, trailers, and vaults. Flowtronex enclosures are not limited by appearance either; projects that require attractive, or camouflaged enclosures to support their surroundings will not be disappointed. Remember to ask about your enclosure options when you spec your next pump station. All pump houses are U.L. Listed and typically require no special permitting.
