FLOWTRONEX®

Nutrifeed

Nutrient Injection System

FLEX SYSTEM

The Nutrifeed Flex System is a completely self contained injection system capable of mixing and storing up to 100 gallons of fertilizer or gypsum. Once mixed, the system can be injected in any irrigation system proportional to the flow of the pump station.

The Flex System is also available with rapid transfer pump for moving mixed materials to bulk storage tanks.

Features

- Fiberglass Lifetime Storage Tank
- Continuous Agitations for Suspensions
- Mix & Transfer Capability
- Gypsum Injector

Engineered for life
